

Quality Assurance Engineer

Islamabad, Pakistan | [Full Time](#)

[Apply Now](#)

About the role

- Review, analyse and evaluate product code according to system specifications.
- Create and execute detailed and well-structured test plans and test cases (manual or automated) and analyse results.
- Plan and coordinate testing activities.
- Create logs to identify, track and document testing phases and defects.
- Design, develop and execute automation scripts using open-source tools (Jira, Selenium, JMeter).
- Perform thorough regression testing when bugs are resolved.
- Develop and apply testing processes for new and existing products to meet client needs.
- Work with cross-functional teams to ensure quality throughout the software development lifecycle.

Requirements

- BS/MS degree in Computer Science, Engineering, or a related field.
- Proven experience of 0 – 3 years as a quality assurance tester.
- Strong knowledge of software QA methodologies, tools, and processes.
- Experience in writing concise, and comprehensive test plans and test cases.
- Hands-on experience with both white box and black box testing.
- Experience in GUI test automation by using Selenium Web Driver (Web application)
