

# Backend Developer

Islamabad, Pakistan | [Full Time](#)

[Apply Now](#)

## About the role

- Design and develop server-side logic and database schemas for web applications.
- Collaborate with frontend developers and UI/UX designers to integrate frontend components with backend functionality.
- Implement RESTful APIs and microservices to facilitate communication between frontend and backend systems.
- Optimize application performance and scalability by implementing caching mechanisms, database indexing, and other optimization techniques.
- Implement security features and protocols to protect sensitive data and prevent unauthorized access.
- Monitor and troubleshoot backend-related issues, including performance bottlenecks and system failures.
- Stay updated on emerging backend technologies and best practices.

## Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- Proven experience of 0 – 3 years as a Backend Developer, with a strong portfolio showcasing your coding skills.
- Proficiency in backend programming languages such as Java, Python, Node.js, or Ruby.
- Experience with backend frameworks such as Spring Boot, Django, Express.js, or Ruby on Rails.
- Solid understanding of relational and NoSQL databases, including database design and optimization.
- Familiarity with cloud platforms and services (e.g., AWS, Azure, Google Cloud Platform).
